

VINEET VERMA

QA Lead | Test Automation | Salesforce & MS Dynamics 365 | CI/CD Quality Gates

Delhi, India | +91 83779 72848 | verma.vineet27@gmail.com | linkedin.com/in/vverma1992 | github.com/vermav27

PROFESSIONAL SUMMARY

QA Lead with 10+ years of experience owning end-to-end quality for enterprise CRM, healthcare, and ad-tech platforms for clients in the US, UK, and Israel. Builds and maintains Selenium-Java and REST Assured automation frameworks integrated with Jenkins, and uses risk-based test strategy and release quality gates to drive go/no-go decisions. Sole QA owner of Shutterstock's Salesforce platform for 5 years, with 4-5 QA engineers mentored and zero critical client escalations.

CORE SKILLS

Test Automation: Java, Selenium WebDriver, TestNG, Maven, AssertJ, Apache POI, Java Faker

API Testing: REST Assured, Postman, Newman

CI/CD & Version Control: Jenkins, Git

Platforms & Devices: Salesforce, MS Dynamics 365, BrowserStack (iOS, Android, cross-browser)

Test Management & Reporting: JIRA, Xray, Azure DevOps, Allure Reports, Log4j

Databases & Design Tools: SQL Server, SQL, Figma

QA Practice: Test strategy and planning, risk-based testing, requirements traceability matrices (RTM), regression optimization, UAT, release readiness, shift-left testing

Methodologies: Agile, Scrum, Scrumban

PROFESSIONAL EXPERIENCE

Think Future Technologies Pvt. Ltd. | Gurugram, India

Associate QA Lead | Sep 2015 – Present

Leadership & Delivery

- Lead end-to-end QA delivery for 3 global client engagements across the US, UK, and Israel, managing up to 2 projects in parallel with zero critical client escalations.
- Mentor 4 junior and shadow QA engineers through pairing, test reviews, and knowledge transfer, bringing new team members to independent delivery within 2 weeks.
- Define release readiness criteria, including automation pass rate, open defect severity, and critical-path results, used for go/no-go decisions on 5+ releases per quarter.
- Introduced shift-left reviews at the requirement, design, and API levels, reducing production defect leakage by 20% across engagements.
- Provide QA effort, risk, and feasibility estimates during pre-planning and backlog grooming, and set shared test and automation standards across parallel projects.

Client: Shutterstock (United States) | Salesforce Platform QA, Sole QA Owner

Apr 2016 – July 2026

- Designed and maintain a hybrid Playwright Javascript automation framework for Shutterstock's Salesforce applications, covering UI and API regression tests.
- Reduced full regression time from 5 days to 3 hours by automating 80% of high-risk test cases and running suites through Jenkins CI.
- Raised Jenkins pipeline pass rate from 70% to 99% by resolving flaky tests and adding automation health checks as release quality gates.
- Own the complete QA cycle for 24 releases per year, covering test strategy and planning, RTM, functional, regression, smoke, and UAT testing, production validation, and post-release support.
- Partner with developers to improve testability, triage automation failures, and prioritize defects in JIRA and Xray, catching 10-15+ defects before production.

Client: Sciensus (United Kingdom, Healthcare) | Mobile & MS Dynamics 365 QA

Nov 2023 – July 2026

- Test the Intouch mobile app on iOS and Android across multiple device and OS combinations using BrowserStack, and validate MS Dynamics 365 functionality.
- Built and maintain a regression suite of 100+ test cases and identified 70 high-value automation candidates, cutting manual regression effort by 80%.
- Participate in Three Amigos sessions, sprint planning, and retrospectives, turning backlog items into acceptance criteria and test scenarios before development begins.
- Validate requirements and UI designs against Figma with business analysts and manage test data, flagging almost every requirement and design gaps before build.

Client: Perion / Growmobile (Israel, Ad-Tech) | Campaign & Data Validation QA

Nov 2015 – Mar 2016

- Tested end-to-end ad campaign workflows, including Google Ads campaigns, verifying targeting, budget allocation, and campaign execution logic.
- Performed functional and data validation for campaign creation and ad delivery across heavy traffic sources in a high-volume environment.
- Logged, tracked, and verified 5+ defects through the full bug lifecycle, supporting on-time releases under tight deadlines.

EDUCATION & CERTIFICATION

B.Tech., Computer Science | Maharishi Dayanand University, Rohtak, Haryana | 2013

Salesforce Certified Administrator | Salesforce | [2013]

ADDITIONAL

Early Mobile Development: Published Windows Phone 8 and Nokia S40 apps through Nokia's DVLUP developer program, ranking among the top 3 developers in India.
