What you can do

● See your full application pipeline at a glance.

● Track each job from Wishlist through Offer or Rejected.

● Search, sort, edit, move, and safely delete job records.

● Export a JSON backup and restore it when needed.

● Open this guide directly from the Help dialog.

1 Add a job

2 Update its status

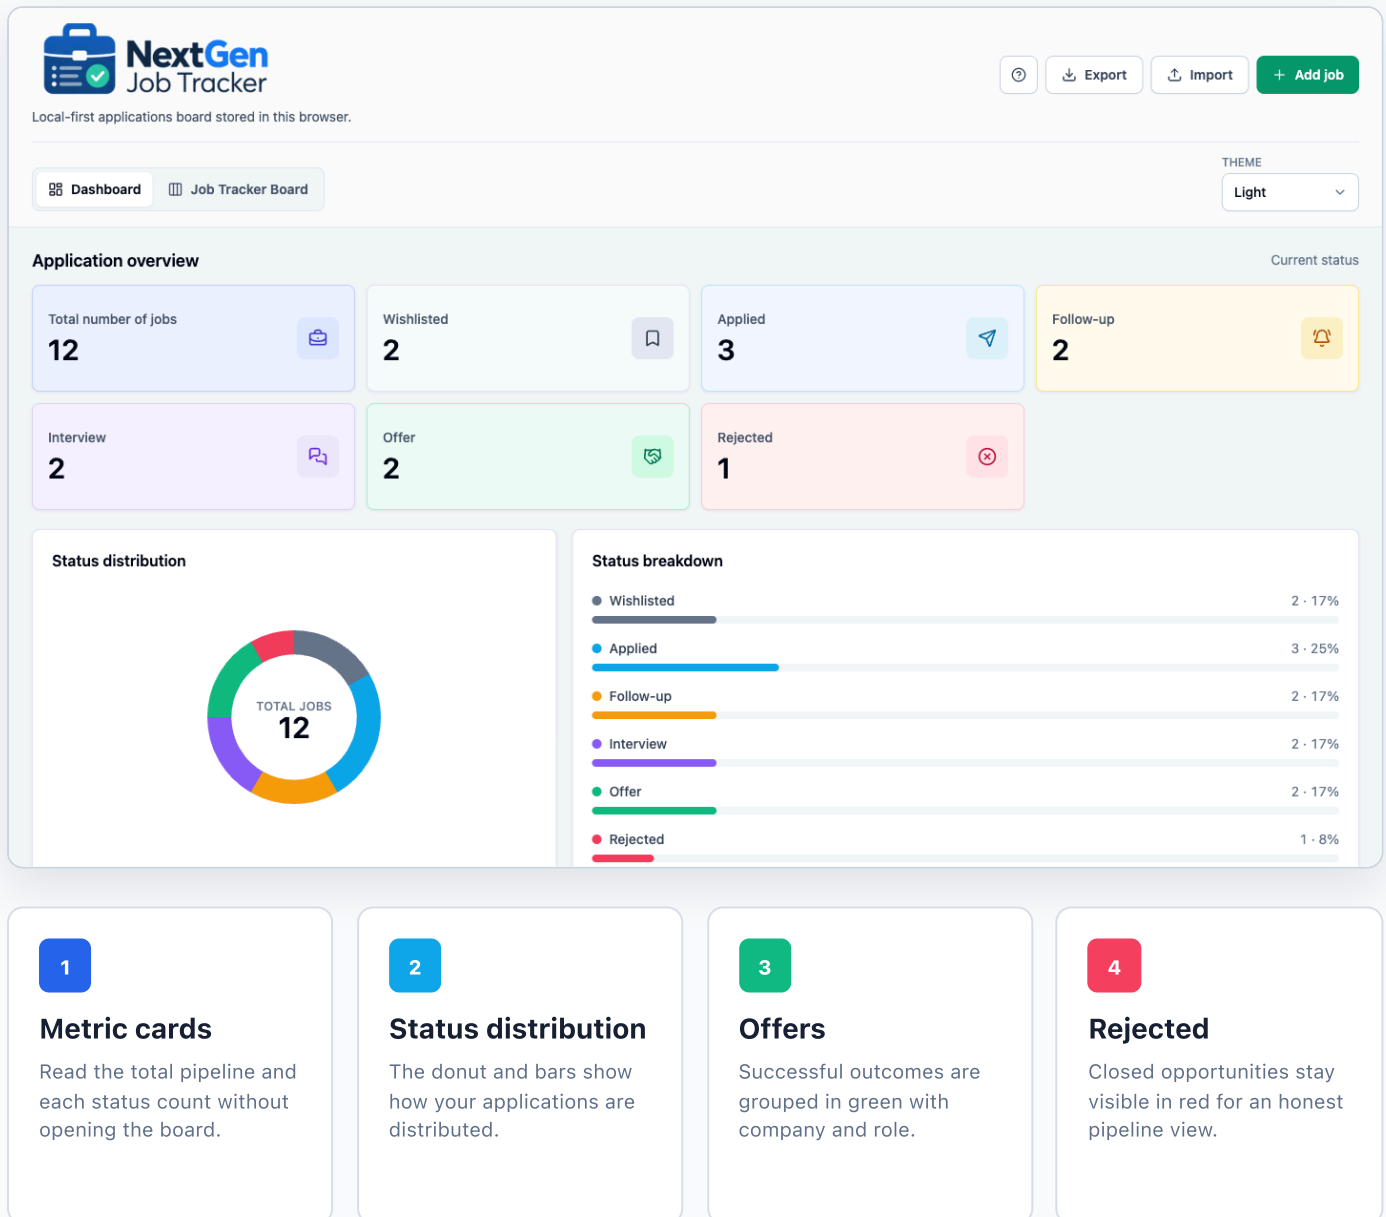

3 Review your results

Change a status

Drag a card to another column, or use the status menu inside the card. The menu is the easiest choice on a touch device.

Organize the board

Use Manual ordering for drag-based order, or choose Newest or Oldest to sort by applied date.

OPEN

Select the source icon to revisit the original job listing.

EDIT

Use the pencil button to update job details at any time.

DELETE

Use the trash button and confirm before the job is removed.

Capture the details that matter

Only company and role are required. Everything else can be added now or later.

1. Start with the essentials

Enter company, role, and current status.

2. Add the source link

Paste a valid job URL for easy return access.

3. Record useful context

Add resume, date, salary, and plain-text notes.

4. Save confidently

Required fields, dates, links, and duplicates are checked.

Applied dates

Moving a Wishlist job forward can add today's date.

Find a job: type any part of the company or role in Search. Clear Search to restore the full board.

The image shows a web browser window displaying the 'NextGen Job Tracker User Guide'. The browser's address bar shows the URL 'http://localhost:3000/'. The page has a light blue header with the title 'NextGen Job Tracker User Guide' and a 'Back to Help' button. Below the header, there's a navigation bar with 'Page 1 of 5' and search, zoom, and refresh icons. The main content area features a colorful horizontal bar (blue, cyan, green, orange, purple, red) and the heading 'USER GUIDE' followed by 'NextGen Job Tracker'. A paragraph describes the guide as a practical tool for reviewing the pipeline, adding opportunities, and backing up local data. Below this is a preview of the application interface, which includes the 'NextGen Job Tracker' logo, a description of the local-first applications board, navigation tabs for 'Dashboard' and 'Job Tracker Board', a 'THEME' dropdown set to 'Light', and an 'Application overview' section with a table showing job status counts (Total number of jobs, Wishlisted, Applied, Follow-up).

```

How to use this tracker [View User Guide](#)

Add a job
Enter the company, role and optional job link.

Move it through stages
Drag a card or use its status menu.

Open the original listing
Select the platform icon.

Find and organize jobs
Use search and sorting.

1. Select the Help icon, then choose **View User Guide**.
2. Use Previous and Next to move through all five pages.
3. Use Zoom Out, Reset, and Zoom In from 75% to 175%.
4. Choose **Back to Help**, Close, or Escape to return.

Jobs and settings live in IndexedDB for this browser profile and app address.

Export saves a dated JSON backup containing your jobs and settings.

Import can Merge or Replace. Light, Dark, and System change appearance only.
